REMARKS

This is UNEVALUATED Information

25X1

On 26 April 1952, the section of the building project at Werbellin See (N 53/V 09), north-northeast of Altonhof, was completed. Four administration buildings and 12 buildings for quarters had been constructed. A second section with 12 buildings for quarters was completed except for the interiors. The foundation walls of the 12 buildings of a third section were built. The construction of the 12 buildings of a fourth section had not been started to date. The construction of a surfaced road, suitable for heavy loads, from the installation to the autobahn southeast of Joachimsthal was planned. The road was to be 3.5 km long. The ballast was brought to the installation by the Bauunion Ost from the Mucker Forest where large amounts of ballast had been stockpiled for a railroad embankment which was to have been built from Karin Hall to Friedrichswalde. *

*

Comment.

6 buildings of

25X1

the 40 buildings planned for construction had been completed. The whole project was scheduled to be completed in about March 1953.

25X1

The present information indicates, however, that 52 buildings will be established, including four administration buildings. It has still to be determined whether the installation will be a camp for Jungpioniere (Young Pioneers) or a barracks installation for troops.
